BHARATH KUMAR P

Senior Python Full Stack Developer | AI Automation | 3+ Years Experience

+91 7550225977 | bharathbk20802@gmail.com | **Immediate Joiner**

PROFESSIONAL SUMMARY

Senior Python Full Stack Developer with 3 years of experience designing, building, and deploying scalable web applications across banking, financial, and e-learning domains. Skilled across the full development lifecycle — front-end, back-end, database design, cloud deployment, and AI-driven automation. Proven track record of delivering secure, high-performance applications, optimizing system workflows, and mentoring junior engineers. Immediate joiner, seeking to leverage strong technical and leadership skills in a challenging senior development role.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend Frameworks: Django, Flask, FastAPI, REST APIs, Microservices

Frontend Technologies: React.js, Redux, Bootstrap, Tailwind CSS, jQuery

Databases: MySQL, PostgreSQL, MongoDB

Messaging & Caching: Redis, Celery, RabbitMQ, Pub/Sub, Task Queues

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, Cloudwatch), Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Nginx

AI & Automation: OpenAI API integration, LangChain, Workflow Automation, RPA scripting, Selenium

Tools & Practices: Git/GitHub, Jira, Postman, Agile/Scrum, Unit Testing (PyTest), System Design

PROFESSIONAL EXPERIENCE

Python Full Stack Developer | ANTS IT Solutions Pvt Ltd, Hyderabad *Dec 2024 – Present*

- Design and develop end-to-end web applications using Python (Django/Flask/FastAPI) for the backend and React.js for the frontend, delivering scalable solutions for enterprise clients.
- Architect and maintain RESTful APIs and microservices, ensuring high availability, security, and performance across production systems.
- Build AI-powered automation modules integrating LLM APIs to streamline document processing, data validation, and reporting workflows, reducing manual effort by over 40%.
- Own deployment pipelines using Docker, CI/CD, and AWS, enabling faster and more reliable releases with minimal downtime.
- Mentor and guide 2 junior developers on coding standards, debugging, and full-stack best practices, improving team delivery speed.
- Collaborate with cross-functional teams (QA, DevOps, Product) in an Agile/Scrum environment to deliver features on schedule.

Graduate Engineer Trainee | Foxconn Technology India Pvt Ltd, Chennai *Oct 2023 – Nov 2024*

- Supported development and testing of internal software tools using Python, contributing to process automation and data reporting.
- Worked with cross-functional engineering teams to identify workflow inefficiencies and implement scripted automation solutions.
- Gained hands-on exposure to production environments, quality processes, and large-scale system operations.
- Built foundational skills in full-stack development, laying the groundwork for a transition into a dedicated developer role.

KEY PROJECTS

Banking Application Platform

Python, Django, React.js, PostgreSQL, Redis, Celery, RabbitMQ, AWS, Docker

- Developed a secure banking application in Django and React.js enabling account management, fund transfers, and transaction history tracking with role-based access control.
- Implemented REST APIs for core banking operations with encryption, JWT-based authentication, and audit logging to meet security and compliance standards.
- Used Celery with RabbitMQ as the message broker to process fund transfers and notifications asynchronously, preventing transaction delays under high load.
- Integrated Redis for session management and caching of frequently accessed account data, cutting average API response time by 30%.
- Containerized the application with Docker and deployed on AWS (EC2, S3) with CI/CD pipelines, improving release frequency and system reliability.

Financial Management System

Python, Flask, React.js, MySQL, Redis, Celery, REST APIs

- Built a financial analytics and expense management system in Flask and React.js with real-time dashboards for budgeting, forecasting, and reporting.
- Integrated third-party financial data APIs and automated reconciliation workflows to reduce manual processing time.
- Scheduled and automated recurring report generation and data sync jobs using Celery, eliminating manual monthly close tasks.
- Applied Redis caching for high-traffic dashboard endpoints, reducing database load and improving page load times.
- Designed responsive UI components and interactive charts to visualize financial KPIs for business stakeholders.

E-Learning Platform

Python, Django, React.js, MongoDB, Redis, Celery, RabbitMQ, AI Automation

- Engineered a full-stack e-learning platform in Django and React.js supporting course management, video content delivery, quizzes, and progress tracking.
- Integrated AI-based automation to auto-generate quiz content and provide personalized learning recommendations for students.
- Used Celery and RabbitMQ to handle background video transcoding and email/notification workflows without blocking user requests.
- Implemented Redis caching for course catalogs and session data, supporting smooth performance for thousands of concurrent learners.
- Deployed the application on AWS with CI/CD pipelines and monitored system health to ensure high availability during peak usage.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

Adhiyamaan College of Engineering | *2019 – 2023*
